MOBILE TECHNOLOGY SOLUTIONS

Today's companies are relying on mobile technology for more than just phone calls. The introduction of the Treo®, the Blackberry®, EDVO PC cards, and even PDAs, productivity is now increased significantly through mobile technology. SPN helps to deliver solutions that are both powerful and simplified so your enterprise gets the most from the available technologies at the very best prices.

SPN partners with the industries leading mobile technology partners such as Cingular, Verizon, Sprint/Nextel, T-Mobile, and many others.

Secure Path Networks provides several solutions for your wireless needs from the procurement of devices and service plans to routine maintenance, upgrades or replacement of hardware, and properly disconnected service when required. Most importantly, we not only assist you with the management of the physical devices, but we ensure that your mobile and wireless spending is where it should be.

Most Comprehensive Solution Available – A to Z

Whether you have mobile technology today or you are looking to introduce the technology to your enterprise in a responsible, way, SPN has the solution for you. SPN will comprise the best solution for you using our industry expertise in mobile telephony, as well as our portfolio of partners to get you the best prices as well.

Lower Total Cost of Ownership

Whether it's the consolidation of multiple carriers and solutions into one provider, the outsourcing of your ongoing support, or even routine audits of your monthly bills from the carriers – SPN will reduce your total cost of ownership.

Rapid Deployments at the Lowest Cost

Through our project management experience and extensive list of partners who provide mobile technology solutions, we are able to deploy wireless infrastructure to a full enterprise rapidly, orderly, and at a rate inline with some of the industry's best rates.

Wirelessly Track and Monitor Your Fleet

By enabling remote access devices on your fleet, SPN offers you the ability to remotely monitor and access your fleet from anywhere in the world using GPS technology. You can monitor your fleet's arrivals and departures, as well as the real-time location of the fleet.
